Links to this page: A Cervantes Saavedra Cervantes Saavedra Cervantes Saavedra Miguel de Cervantes Saavedra, Miguel d Cervantes Saavedra, Miguel de Cervantes Saavedra, Miguel de--Writer Cervantes Saavedra, Miguel de-Writer Cervantes Saavedra, Miguel de Cervantes M cervellière cervena Cervena Klevanjka Cervical c Cervical Acceleration Deceleration Cervical adenitis cervical aden cervical anchorage cervical anchorage cervical ankylosis cervical ankylosis cervical ankylosis value to the lack of metaphorical better medical terms, prefixes and suffixes combined with root words are like ova and sperm. Separately, they don't make sense. But together, they produced a new one. In this case, of course, it is a word and not a baby. But they're comel, aren't they? Here are some prefixes and related abilities. What Prefix Ante Meant- Before Dys- Painful, Difficult Endo- In Hydro- Intra Water In Various- Many Neo- New Nulli- No Fairies-Around Primi- Secundi First- Second Suffix What Does It Mean -algia Pain -arche Beginning -cyesis Pregnancy -ectomy surgical repair plasty -rrhagia Burst forth, excessive flow -salpinx Fallopian tube -tocia Labour By adding root words and shape, you start making your own little word baby. If you ever spend time in the OB-GYN office, even as a patient, you will recognize many of the roots associated with this woman. Root Words What Amni/o Amnion Cephal/o Cervix/Neck Chori/o Chorion Colp/o Vagina Culd/o Retrouterine pau (cul-de-sac) Cyes/o, cyes/i Pregnancy Embria /o Embryo Endometrial/o Endometrial Episi/o Vulva Fet/o Fetal Fimbria Galact/o Flirtatious Milk/o Genitalia Gonad/o O Ovaries Gravida Pregnancy Gynec/o, gyn/o Female, female hyster/o Uterus Laksam/o Hungry Milk/o Abdomen Mamm/o, mast / o Men's Breasts / o Menstruation Metr / o, metr / io Rahim Mult / i Many Myometrial Nat / o, nat / i Birth null / i No Oliq / o Scanty Omphal / o, umbilic / o Umbilicus, navel Oophor / o Ovary Ov / o, ov / i, ovul / o Egg, ovum Papill / o Nipple Pelv / i, pelv / o Pelvis Perine / o Perineum Prim / i Pseud First / o Fake Puerper / o Giving Birth salping / o Fallopian tube Umbilicus, Navel Rahim / o Rahim Vagin / o Vagina Vulv / o Vulva There are so many medical terms related to the female breeding system that it is impossible to classify every single one of them here however, here are a variety of anatomical and clinical words that will make you know about this system. Adnexa: Accessory part of Anteversion organ: Front tip of coitus/uterine copulation: Estrogen sex: Hormones produced by ovari responsible for female sex features and building the lining of the uterus during gynopathic menstrual cycles: Related to female disease Hydrosalpinx: Water in leukorrhea fallopian tubes: White faraj release, sometimes can contain white blood cells Mastoptosis: Breast sagging Menarche: Beginnings hid Misometrium: Muscle lining lining of the lining of the lining of the lining of the uterus Oligomenorrhea: Orifice menstrual flow scanty: Opening Progesterone: Hormones produced by luteum corpus in ovari and by placenta during Akil toddler pregnancy: Begins fertile period when the game is produced and secondary sex characteristics become retroversion concussion: Abnormal tips to the back of the uterine salpingitis: Inflammation of fallopian tubes Some medical terms are specific to the obstetric properties of this system.
